

STADIUM

Project location
Rahovec, Kosovo

Project period
2018

Client
MYCS -Ministry of Culture, Youth & Sports

Total area
Sq.m 3673.3 m²

Project description
The task of our company was Design for the stadium which is in the category of FIFA II, it features G+2 floors. The project is foreseen for the existing stadium location of Rahovec. With the situation planning we have attempted a more rational use of the parcel as well as unhindered access by motorized vehicles or on foot. The building has a smooth horizontal silhouette with a wide extension on the urban terrain. The dominant volume of the building is the tribune facility where it has 2000 seats for spectators, the building consists 3 levels that are. It has 7 entrances in the stadium where all of them have direct access to 7 vertical communication.
