

# THE PHOTOVOLTAIC PARK "SOLAR GATE"

**Project location**  
Podujeva, Kosovo

**Project period**  
2018-ongoing

**Client**  
Solar Gate L.L.C

**Total area**  
Sq.m 56,300m<sup>2</sup>

## Project description

The task of our company is to assist in the development of the preliminary and detailed design of the photovoltaic park. The park will have a production capacity of 3 MW in an area of 56,300m<sup>2</sup>. It includes around 10,000 silicone polycrystalline photovoltaic modules with a capacity of 300 watt which are ecofriendly and around 50 inverters, that convert the sun's energy from direct current (DC) to alternative current (AC) or usable electric energy. The construction also enables angle adjustment to maximize production during different seasons.
